

CHAMOUS SUBER

Greenville, SC | (864) 363-1837 | Subercv@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Proactive IT Support Specialist and WGU Cybersecurity student with a proven track record in Tier 1 and Tier 2 enterprise support.
- Hands-on problem solver experienced in fixing inefficient workflows and leveraging AI-assisted development to build custom hardware and operational utilities.

TECHNICAL SKILLS

- **Core IT & Networking:** Tier 1 & Tier 2 Desktop Support, LAN/WAN Troubleshooting, Hardware Lifecycle Management, Active Directory (AD) Administration, Cisco VPN, Windows Print Manager
- **Systems & Deployment:** SmartDeploy (OS Imaging), Soti MobiControl (MDM), Oracle ERP, SAP Administration, Windows 11, macOS Support
- **Diagnostics & Security:** SentinelOne (EDR), Splunk, Digital Forensics Support, Access Control, Security Compliance
- **Management & Remote Tools:** NinjaOne RMM, Zendesk (Ticketing), RingCentral (VoIP)
- **Development & Automation:** Swift, SwiftUI, MapKit, Vision Framework (OCR), Xcode, Git, Cursor, Gemini, Claude, ChatGPT, Replit, Gork (AI-driven development & architecture reasoning)
- **Hardware Environments:** Homelab Administration, Ubuntu Server, UGREEN NAS (RAID 1), Mac mini, Cisco 1300 Switches, Zebra Industrial Printers, Kali Linux Distro

WORK EXPERIENCE

Help Desk Analyst | *Kravet LLC* | Anderson, SC

Jun 2026 - Present

- Provide comprehensive Tier 1 and Tier 2 desktop support in a heavy Windows 11 and Dell client hardware environment, while also supporting macOS systems.
- Administer and manage user accounts, permissions, and security groups heavily utilizing **Active Directory (AD)**.
- Utilize **SmartDeploy** to build, capture, and deploy standardized Windows 11 OS images to corporate and remote machines.
- Manage, monitor, and remote into endpoints globally using **NinjaOne RMM** and troubleshoot secure connections via **Cisco VPN**.
- Respond to and resolve incoming service requests using **Zendesk** for ticketing, supporting Google Workspace, **Oracle**, **SentinelOne** endpoint security, and **RingCentral VoIP** platforms.
- Configure, maintain, and troubleshoot enterprise peripherals, including desktop printers and industrial-grade **Zebra printers**.

- **Key Achievement (First Month):** Overhauled, audited, and completely organized the local IT hardware and peripheral inventory, establishing a highly accurate asset tracking baseline.

IT Support Technician | *Publix Supermarkets* | Greenville, SC

Feb 2025 - Present (Transitioned to Part-Time June 2026)

- Deliver Tier 2 technical support for enterprise hardware, software, and networking infrastructure across 19 physical retail stores, expanding to 39 locations when serving on-call.
- Provide high-stakes customer service, supporting both internal and external customers to resolve technical issues with minimal business disruption.
- Troubleshoot, maintain, and upgrade desktop workstations, network laser printers, mobile devices, RF scanners, digital retail scales, and **uninterruptible power supplies (including CyberPower 750, APC 3000, and APC 420 UPS units and backup batteries)**.
- Leverage **Splunk** to monitor network speeds, conduct hardware diagnostics, and analyze system logs to proactively address connectivity bottlenecks.
- Manage the complete hardware lifecycle, overseeing the secure installation, configuration, and decommissioning of enterprise equipment according to corporate refresh schedules.
- Utilize **SAP** for accurate order generation, supply tracking, and regional fulfillment pipelines.
- Close an average of 30 tickets per week with a 90% SLA.
- Consistently maintain a 95% first-visit resolution rate.
- Provide constant support to coworkers while maintaining high individual productivity.

Baker | *Publix Supermarkets* | Greenville, SC

Apr 2018 - Feb 2025

- Stepped into leadership and operational management roles during department manager absences, supervising daily workflows and ensuring regulatory compliance.
- Mentored and trained incoming associates on operational standards, customer service excellence, and safety protocols.

Purchasing Agent | *Vanir Installed Sales* | Anderson, SC

May 2023 - Aug 2023

- Managed materials procurement and order pipelines using **BuilderTrend** and **Liftoff**, analyzing architectural blueprints and project scope sheets to ensure precise inventory control.

- Maintained meticulous procurement logs, inputting financial data into corporate accounting systems and coordinating directly with project managers and external vendors.

Investigative Intern | *Greenville County Sheriff's Office* | Greenville, SC

Jan 2021 - Apr 2021

- Assisted detectives with complex white-collar crime, domestic violence, and digital crime investigations.
- Gained practical exposure to the preparation and execution of search warrants targeting digital evidence.
- Supported suspect identification efforts utilizing IP address tracking, peer-to-peer (P2P) file-sharing network analysis, and National Center for Missing & Exploited Children (NCMEC) data packets.

TECHNICAL PROJECTS

Zebra PSU Tracker – iOS Hardware Automation Utility | *Swift, SwiftUI, AI-Assisted Development (Cursor, Gemini, Claude)*

- Designed and built a custom iOS hardware utility application utilizing Swift and SwiftUI, leveraging AI-assisted development workflows (Cursor, Gemini, Claude) for rapid prototyping and debugging.
- Automated the identification, collection, and organization of faulty Zebra Power Supply Unit (PSU) data, converting manual physical audits into clean, structured spreadsheet exports.
- Drastically reduced administrative overhead during the first month of deployment, transforming a critical enterprise-wide hardware replacement initiative into an efficient, automated batch-reporting workflow.

Work Time Tracker – iOS Field Utility App | *Swift, SwiftUI, MapKit, Vision OCR*

- Designed and built a custom iOS field utility application inside a macOS development environment using Swift, SwiftUI, and Xcode.
- Leveraged **AI-driven development tools** (Cursor, Gemini, Claude) for rapid prototyping, architecture reasoning, and code review.
- Integrated **MapKit (MKDirections API)** to display interactive maps of all regional Publix store locations, providing field technicians with one-tap navigation routing.
- Implemented on-device Optical Character Recognition (OCR) using the **Vision Framework** and built calculation utilities to convert hours to decimals, track drive times, and optimize shifts.

Enterprise PowerApp – Digital PM Checklist | *PowerApps, SharePoint*

- Designed and deployed a custom PowerApp to modernize store-level Preventative Maintenance (PM) workflows.
- Replaced legacy paper-based checklist processes with a structured digital data pipeline backed by SharePoint lists, drastically improving data integrity and reporting speeds.

Homelab Research | *Ubuntu, RAID, Mac mini, Cisco Networking*

- Configured and maintained a local homelab running **Ubuntu Server OS** paired with a **UGREEN NAS** in a RAID 1 configuration for secure data redundancy.
- Integrated a dedicated **Mac mini** to serve as a local compute and macOS development resource.
- Engineered a localized testing subnet utilizing a **Cisco 1300 switch** and TP-Link Access Point to study secure network routing and access control lists.

EDUCATION & CERTIFICATIONS

Western Governors University | *B.S. in Cybersecurity and Information Assurance Enrolled Nov 2023 – Present*

Clemson University | *B.A. in Criminal Justice (Honors) Graduated: Dec 2021* | Air Force ROTC

Professional Certifications

- **CompTIA Security+** - Exp: 2028
- **CompTIA Network+** - Exp: 2028
- **CompTIA A+** - Exp: 2028
- **CompTIA Data+** - Exp: 2028
- **ITIL 4 Foundations** - Exp: [Year]
- **LPI Linux Essentials** (No Expiration, Issued Jul 2025)
- **Certified Computer Technician** - No Expiration

INTERESTS

- **Podcasts:** *Hacking Humans, CISO Series, Defense in Depth, Heavy Networking, The Art of Network Engineering*
- **Interests:** Drone Photography, Network Defense, Clemson Athletics, Hiking, Ultimate Frisbee
